EXPLANATION OF 1ST VISIT—No In-Office Supply

SUBOXONE®  (buprenorphine HCl/naloxone HCl dihydrate) sublingual tablet

Your 1st visit is generally the longest, and may last anywhere from 1 to 4 hours.

When preparing for your 1st office visit, there are a couple of logistical issues you may want to consider.

- You may not want to return to work after your visit—this is very normal, so just plan accordingly
- Because SUBOXONE can cause drowsiness and slow reaction times, particularly during the 1st few weeks of treatment, driving yourself home after the 1st visit is generally not recommended, so you may want to make arrangements for a ride home

It is very important to arrive for your 1st visit already experiencing mild to moderate opioid withdrawal symptoms. If you are in withdrawal, buprenorphine will help lessen the symptoms. However, if you are *not* in withdrawal, buprenorphine will “override” the opioids already in your system, which will *cause* severe withdrawal symptoms.

The following guidelines are provided to **ensure you are in withdrawal for the visit**. (If this concerns you, it may help to schedule your first visit in the morning: some patients find it easiest to skip what would normally be their first dose of the day.)

- No methadone or long-acting painkillers for at least 24 hours
- No heroin or short-acting painkillers for at least 4 to 6 hours

Bring ALL medication bottles with you to your 1st appointment.

Before you can be seen by the doctor, all of your paperwork must be completed, so bring all your completed forms with you or arrive about 30 minutes early. In addition, you will need to pay the doctor’s fees prior to treatment.

Urine drug screening is a regular feature of SUBOXONE therapy, because it provides physicians with important insights into your health and your treatment. Your 1st visit will include urine drug screening, and may also entail a Breathalyzer®* test and blood work. If you haven’t had a recent physical exam, your doctor may require one. To help ensure that SUBOXONE is the best treatment option for you, your doctor will perform a substance dependence assessment and mental status evaluation. Lastly, you and your doctor will discuss SUBOXONE and your expectations of treatment.

After this portion of your visit is completed, your doctor will give you a SUBOXONE prescription. You fill the prescription at the pharmacy and return to the doctor’s office so you can take the medication in a safe place where the medical staff can monitor your response.

Your response to the medication will be evaluated after 1 hour and possibly again after 2 hours. Once the doctor is comfortable with your response, you can schedule your next visit and go home. Your doctor may ask you to keep a record of any medications you take at home to control withdrawal symptoms. You will also receive instructions on how to contact your doctor in an emergency, as well as additional information about treatment.

CHECKLIST FOR 1ST VISIT:

- Arrive experiencing mild to moderate **opioid withdrawal** symptoms
- Arrive with a **full bladder**
- Bring completed **forms** (or come 30 minutes early)
- Bring **ALL medication bottles**
- Fees due** at time of visit (cash or check)
